

Gerald Truong

Austin, TX | 512-844-1084

[linkedin.com/in/geraldtruong](https://www.linkedin.com/in/geraldtruong)

PROFESSIONAL SUMMARY

Senior Front-end Engineer & AI Specialist with over 10 years of experience building high-quality, performant UI components and design systems. Proven expertise in React, component libraries, and design-to-code implementation. Recently leveraged Generative AI, autonomous agents, and RAG architectures to automate complex data workflows. Combines strong architectural discipline with creative problem-solving and a passion for crafting exceptional user experiences.

TECHNICAL SKILLS

AI & Machine Learning: Python, PyTorch, LangChain, LlamaIndex, OpenAI API (GPT-4), RAG, Prompt Engineering, Pinecone (Vector DB), Embeddings.

Backend & API: Node.js, NestJS, Express.js, FastAPI, TypeScript, Ruby, Java, PostgreSQL, RESTful APIs.

Frontend Development: React.js, Vue.js, Vite, JavaScript (ES6+), D3.js (Data Visualization).

Testing & DevOps: Playwright (E2E), Jest, CI/CD (GitHub Actions), Datadog, Docker, Git, AWS S3 / Lambda / DynamoDB, Google Cloud Run / Compute / Storage

Tools: Jira, Figma, Salesforce, HubSpot, Slack.

AI & ENGINEERING EXPERIENCE

EDLINK

Austin, TX

AI Software Engineer

2023 - Present

Leveraged Large Language Models (LLMs) to revolutionize data integration workflows for education technology.

- **AI Agent Development:** Engineered an autonomous AI agent using LangChain and GPT-4 to parse and transform non-standard CSV files into OneRoster 1.1 compliant formats. Result: Reduced manual data mapping time from 8 hours to 15 minutes per district onboarding.
- **RAG Implementation:** Designed and deployed a RAG chatbot using OpenAI embeddings and Pinecone vector database. Result: Significantly reduced support ticket volume by answering technical integration questions instantly.
- **Full-Stack API Engineering:** Developed TypeScript APIs (NestJS) to sync rostering, assignment, and grade data across major SIS/LMS platforms (Canvas, Schoology, Google Classroom).
- **UI & Tooling:** Built a custom JSON editor from scratch and a data pipeline monitoring dashboard using Vue.js.
- **DevOps & QA:** Implemented GitHub Actions for CI/CD pipelines, ensuring 100% test coverage via Jest unit tests and Playwright E2E testing.

Technical Account Engineer

2024 - Present (Concurrent Role)

- **Solution Engineering:** Translated complex SSO and LTI integration requirements into implementable technical solutions for enterprise clients.
- **Data Automation:** Designed custom Python/JS transformation scripts to normalize disparate student data formats, reducing manual cleanup efforts by 80%.

SENIOR SOFTWARE ENGINEERING EXPERIENCE

MEDIDATA SOLUTIONS

San Francisco, CA

Staff Software Engineer

2020 - 2023

- **Architecture:** Led the architecture, design, and implementation of 1XDS, Medidata's core component library,

standardizing UI/UX across the clinical trial platform.

- Leadership: Directed a team of developers in building a robust Node.js application for the clinical financial management suite.
- Collaboration: Partnered with Data Science teams to ensure API specifications met strict data consumption requirements for clinical modeling.

Senior Software Engineer

2017 - 2020

- Test Automation: Spearheaded the research and implementation of E2E testing frameworks using Puppeteer/Playwright, significantly improving release stability.
- Modernization: Led the migration of legacy Angular codebases to React/Redux.
- Mentorship: Trained junior developers in React patterns and UI automation strategies.

SYNACK

San Francisco, CA

Senior Software Engineer

2015 - 2017

- Data Visualization: Implemented complex, interactive cybersecurity data visualizations using D3.js, React, and Redux.
- Product Delivery: Collaborated with product owners to take features from conceptual design to deployment.

JOBSCIENCE

San Francisco, CA

Technical Lead

2013 - 2015

- Salesforce Development: Designed a Single Page Application (SPA) on the Salesforce Platform for candidate assessment.
- Feature Integration: Successfully integrated PDF.js to enable in-app resume viewing.

JASPERSOFT

San Francisco, CA

Software Engineer

2011 - 2013

- API Development: Lead developer on Visualize.js, a JavaScript framework allowing developers to embed BI reports and visualizations into web apps.

EDUCATION

Post Graduate Program in AI and Machine Learning

The University of Texas at Austin (McCombs School of Business) | Jan 2024

Masters Electrical Engineering

California State University Long Beach
